Q4 EOY PROMOTIONS 2025

Available 01/10/2025 to 31/12/2025

sopix series

Smart Sensors for effortless performance

Because your mission is demanding we have developed a range of smart digital sensors to ensure you a high resolution image that automatically adjusts to your needs and those of your patients.

Leader in the dental and imaging industry, ACTEON® place its 20 years of expertise at your service.

Made in France, SOPIX® sensors are a concentrate of innovation and quality, guaranteed by 2 patents.

Sopix2 USB Sensor SIZE 1 - High Definition for Windows or Mac
Sopix 2 USB Sensor SIZE 2 - High Definition for Windows or Mac

pspix2

By your side, to care for everyone

ACTEON® place its 20 years of expertise at your service and those of your patients.

The first simple and intuitive personal imaging plate scanner provides outstanding images and was designed to free practitioners from constraints.

Whatever your patient's morphology or pathology, the PSPIX®^{2} adapts to your needs. As your personal assistant or in collaborative mode, experience high productivity without compromising on quality.

1 - **Striking Contrast** for a more reliable Diagnosis

2 - **The Smallest Scanner** on the market

3 - **The Fastest Scanner** on the market

4 - The **most intuitive** Scanner

5 - **Thin and flexible imaging plates** of various sizes for adaptability and outstanding patient comfort.

PSPIX2 RRP $15,890.00 **SPECIAL OFFER $11,150.00**

For more Information or to place orders, contact you preferred Acteon distributor or call **Acteon ANZ**
Toll Free **1300 ACTEON** (1300 228 366) or Sydney (02) 9669 2292 or Email **acteon.anz.promo@acteongroup.com**

x-mind ac x-mind dc

acteon

Experience intuitive excellence

Designed to simplify daily operations, prioritise patient safety and ehanced dental workflows X-MIND AC/DC is the perfect choice for modern dental professionals.

Three arms lengths are available : 41 cm (16.2”), 82.5 cm (32.5”) and 110 cm (43.5”) and can be: Top wall mounted Bottom wall mounted Dental unit, ceiling and mobile version are also available.

X-MIND DC vailable with
Remote Wireless Control
- No more wiring issues
- Cost effective
- Enhanced Convenience

MADE IN ITALY • FABBRICATO IN ITALIA •

2 YEARS WARRANTY

X-Mind DC Contact your Authorized Acteon Dealer for Special Pricing
X-Mind DC Wireless Button $945.00 RRP

x-mind unity

Unity... is strength

X-MIND® Unity is Acteon’s outstanding DC intra-oral X-ray generator, combining elegant design with technological solutions derived from longstanding imaging know-how. The constant potential, high frequency DC generator combined with a small focal spot (0.4 mm) and a complete range of radiological settings, is enginerred to offerhigh standards of image quality and safety in a simple and intuitive way, perfectly integrated into the users workflow..

X-Mind® unity is available in different configurations allowing to fulfill any operational need. Arm lengths: 0.40 m, 0.80 m, 1.10 m - installation type: top wall, bottom wall, mobile stand.

X-MIND Unity RRP $8,025.00 **SPECIAL OFFER $6,740.00**

C50 Full HD Camera

with diagnostic Aid Option

The **C50 Camera** with diagnostic-aid option is the only camera on the market to cover so many pathologies, featuring 4 integrated vision modes for seamless navigation.

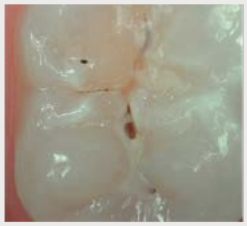

4 CAMERAS IN ONE.

Remarkable clinical vision

- **Full HD resolution** for superior image qualityw
- **Autofocus** for a clear image
- **4 camera shots available**; macrovision, single tooth, smile and portait

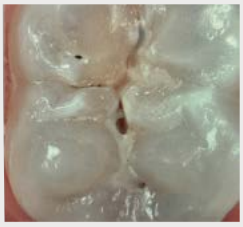

Remarkable clinical versatility

DAYLIGHT MODE

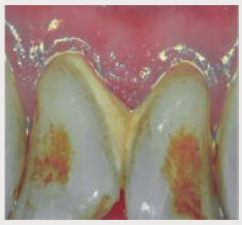

Record of **natural colors** for a better interpretation of tooth shade, pathology identification and patient follow-up

DAYLIGHT+ MODE

High contrasts emphasizing anatomic fissures and details of the dentin structure/depth.

PERIO MODE

Enhancement of **dental plaque and gingival inflammation** thanks to chromatic amplification.

CARIO MODE

Caries **detection by fluorescence** technique by LEDs.

To order: C50 with diagnostic Aid S_C50_0001 C50 without diagnostic Aid S_C50_0002

New Product Release

C20 Easy to use, Easy to master...

Full HD
Capture every detail for confident diagnostics.

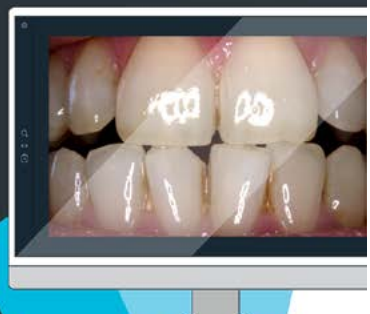

Bright Halo
Provides a soft, uniform light around the teeth, ensuring exceptional clarity and visibility for precise diagnostics and detailed imaging.

Fog light
Prevents lens condensation during use, ensuring clear, uninterrupted visuals of the teeth for accurate diagnostics and consistent image quality.

Automatic flipping
Ensures the image is always correctly oriented, whether capturing maxillary or mandibular views, providing seamless and intuitive imaging without manual adjustments.

Plug & Play connectivity
Mac and Windows compatible

Seamlessley navigate the patients mouth
The C20 enables easy diagnosois, treatment planning and patient communication.
High-quality full HD images help your patients understand their oral health and encourage two way communication that boosts treatment acceptance rates.
A 25% growth was observed in treatment the acceptance rates*.

NEW PRODUCT RELEASE

x-mind optima 3D

The Smartest, The Smallest, The Ultimate.

In today's rapidly evolving field of dentistry, the integration of CBCT and Artificial Intelligence is transforming patient care, enabling dental professionals to make more accurate diagnoses and perform safer procedures.

Embracing this cutting-edge integration is not only elevating the standard of care but also optimizing efficiency and patient communication in modern dental practices.

X-MIND® optima 3D represents the perfect combination of advanced hardware technology, enclosed in a lightweight and compact design and next-generation software, RealGuide™ 5.4, bringing the benefits of Artificial Intelligence into every step of patient care, from a precise diagnosis to more effective treatments and patient communication.

Exceptional clarity.

At the heart of the X-MIND® optima 3D is **state-of-the-art detector technology**, which guarantees exceptional image clarity and outstanding anatomical coverage. **Its comprehensive range of Fields of View (FOV)**, from 5x5 to 17x12 cm (Ø x H), makes it suitable for a **wide range of dental procedures**, from general dentistry to orthodontics and maxillofacial surgery, while increasing tolerance for patient positioning and reducing the risk of marginal artifacts.

EXTRAORDINARY CLARITY
Get the most out of quality with the brand-new **ClearIQ** filter

OUSTANDING VERSATILITY
From 5x5 to 17x12, a tailored solution for every clinical need

TOP-LEVEL PERFORMANCE
Enhanced image depth with the new kV output range 60-90

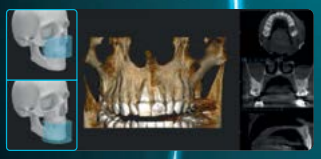

5x5 cm FOV
- Improves the **detection of root canals**, particularly in case of abnormal root canal **shapes**

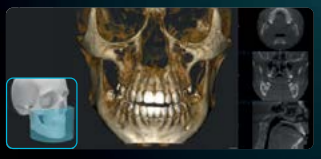

8.5x5 cm FOV
- Useful for **implant surgery** and in **general dentistry** as a low dose exam as **limited to a single jaw**

8.5x9 cm FOV
- Useful for **complex implant surgery** as well as left or right TMJ diagnosis

12x10 cm FOV
- Suitable for most **oral surgery cases** including multiple implant surgery

17x12 cm FOV New
- Represents the perfect solution for **complex orthognathic cases, zygomatic implant planning and orthodontic surgery**

SPECIAL OFFER **Buy** Optima CBCT **Get** 1 x C20 Camera or 1 X Sopix 2 Sensor Size 2 **FREE**

Eurosonic 4D
The new dimension of ultrasonic washing

Eurosonic 4D is the most advanced 3.8 L ultrasonic tank in the range. Equipped with an LED-backlit display controller, it is intuitive and user-friendly thanks to the lights indicating the different cycles, times and temperatures.

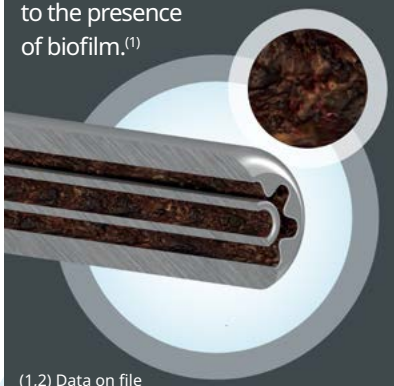

SPECIAL INTRODUCTORY OFFER $2,750.00 RRP $3,460.00

Riskontrol® your 'must have' for safe, aseptic procedures

METAL TIPS

It is impossible to clean the inside of reusable tips adequately due to the presence of biofilm.(1)

(1,2) Data on file

"With regard to cleaning and sterilization, disposable tips were found to be more acceptable in clinical use than metal tips.(1)"

Expasyl Exact paste

Expasyl™ Exact paste provides excellent benefits with little risks. Its viscosity has been carefully calculated to open the sulcus effectively without damaging the epithelial attachment. Your procedure is both safe and effective.

- Expasyl™ facilitates access to the preparation limits and emergence profile for perfect impressions
- The compound opens the sulcus and dries it (blood, saliva and fluids) completely
- Cost-effective = no waste of material
- Works with composite applicator gun

Servotome II A New Impulse In Electrosurgery

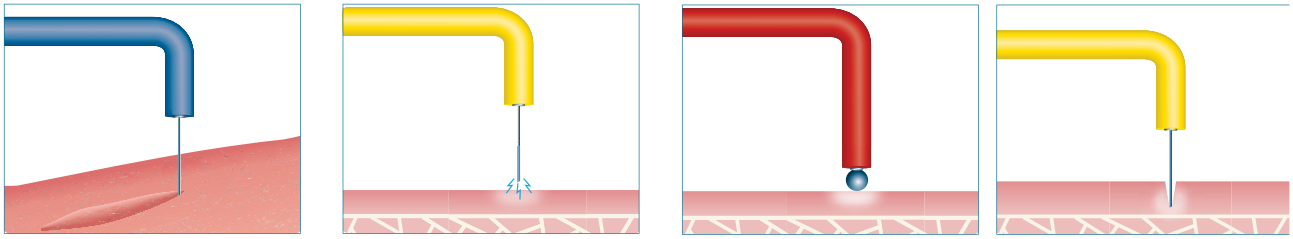

Experience the benefits of eletrosurgery

High frequency electrosurge or orthodontics, periodontics and other oral surgery with a single footswitch, a box with 10 electrodes & a conductive bracelet.

Electrosection
Vaporizing the tissue with the active electrode makes it possible to cut quickly without damaging the edges of the incision.

Fulguration
Makes it possible to surface coagulate gingival tissue while protecting the underlying layer.

Coagulation
Concentrating energy at the surface of a massive electrode makes it possible to diffuse the heat to the surrounding tissue and produce instantaneous hemostasis.

PIEZOELECTRIC SURGERY IS POWERFUL ENOUGH TO CARRY OUT EXTRACTIONS AT THE SAME SPEED [1] AS ROTARY INSTRUMENTS!

PIEZOTOME CUBE

Socket preservation [9]
Safe for soft tissues
Recommended for immediate implant placement
No force needed
50% less pain & swelling [2]
98% less analgesics intake [1]

1, 2, 9 References available on file

Why Australian Dental Practices should adopt Piezotome Technology like the Acteon CUBE

By: **Christopher Moore** *(National Sales Manager Acteon UK)*

In the rapidly advancing field of dental surgery, ensuring patient safety, comfort, and optimal clinical outcomes is a priority for any modern dental practice. One technology that is making a significant impact in achieving these goals is piezotome technology, such as the Acteon CUBE. For NZ dental practices, adopting this innovation could elevate the standard of care across a range of procedures, including bone surgeries, extractions, sinus lifts, crest splitting, and crown extensions.

Precision and Safety: A New Era in Bone Surgery
Piezotome technology uses ultrasonic vibrations to precisely cut bone while preserving adjacent soft tissues, afeature that traditional rotary instruments simply cannot match. This precision is especially valuable in complex procedures like sinus lifts and crest splitting, where accuracy is critical to avoid complications. By minimising trauma to surrounding tissues, piezotomes not only enhance surgical precision but also reduce the risk of unintended damage to nerves, blood vessels, and membranes.

Improved Patient Experience
Patient comfort is at the forefront of any dental procedure. Unlike traditional bone cutting tools, piezotomes operate at ultrasonic frequencies that reduce trauma to the bone. This translates into less post-operative swelling, reduced bleeding, and shorter recovery times, offering a far more comfortable experience for patients undergoing extractions or crown extensions. In a highly competitive market, the ability to offer minimally invasive surgery can help attract and retain patients who prioritise a smoother and faster recovery.

Faster Healing and Long-Term Outcomes
One of the key advantages of piezotome technology is its ability to promote faster and more predictable healing. Because the technique is less invasive and causes minimal damage to the surrounding tissues, it helps preserve blood supply and bone integrity. This is particularly beneficial in sinus lifts and bone grafting, where maintaining the health of the bone is crucial for successful outcomes. In the long run, this can lead to more predictable and stable results, enhancing patient satisfaction and practice reputation.

Versatility Across Procedures
From routine tooth extractions to advanced bone surgeries, the Acteon CUBE and other piezotome devices offer versatility that is unmatched by conventional tools. Whether it's refining bone cuts during crest splitting or performing delicate work in crown extensions, piezotomes provide dental professionals with greater control and precision. This adaptability makes them invaluable across a wide range of surgical applications, enabling practices to expand their service offerings and improve clinical outcomes.

Enhancing Your Practice's Reputation

In an era where patients are more informed and discerning about their treatment options, incorporating cutting- edge technology like piezotomes can set your practice apart. Being able to advertise the use of minimally invasive techniques that reduce recovery times and enhance comfort is a compelling proposition for patients. Furthermore, offering this advanced level of care can help build trust and enhance your practice's reputation within the community.

Conclusion: A Strategic Investment
Adopting piezotome technology such as the Acteon CUBE isn't just about staying ahead of the curve; it's about delivering better care. The precision, patient comfort, and faster healing associated with this technology make it an

essential tool for dental practices that aim to provide the highest standard of treatment. For UK dental practices looking to elevate their offerings, piezotome technology represents a strategic investment that pays off in patient satisfaction and clinical success.

New Product Release

Euronda E10 Autoclave

Digital Traceability

In compliance with EN 13060, all sterilization cycles are saved on USB (for E10) or SD Card (for E9) and can be transferred to a PC via Ethernet or WiFi connection

Load validation and release

This function allows users to keep a digital record of the compliance of the sterilization process in both the loading phase and the unloading phase. The operator ensures that the pouches are dry and checks their integrity and the state of the instruments, while also making sure that the sterilization parameters are satisfactory.

Print set options

The expandable traceability system allows three types of printers to be installed, depending on requirements. Set 1 and 2 can be installed at the front of the autoclave without any additional space whilst print set 3 is installed outside the device.

E-Memory is the software for the complete archiving, management and traceability of all sterilization cycles and data directly on a PC. This application can automatically, semi-automatically or manually capture data from the sterilization process and save it directly to the computer. This data can be easily organised, searched, printed and emailed. E-Memory also makes it possible to trace and select all information related to the cycles performed by the different devices (thermodisinfector, sealer and autoclave) involved in the sterilization process. It is easy to consult and manage, and allows you to send selected cycles and data directly to technical support in just a few clicks, and to automatically produce reports and PDF certificates with header, graphic logo and personal data.

BUY 1 x E10 Euronda Autoclave, **$12,995.00** RRP $17,750.00
GET 1 x in built Printer **FREE** *Plus*
1 x Eurosonic 4D Ultrasonic Bath or 1 x C20 Camera **FREE**
